Scuff Tires Amendment
Effective 7.17.19

The only way cars/teams are eligible to scuff tires are as follows:

- New to the track for the season
- Tires are damaged from previous race and/or unsafe and cannot be used. Tires should be impounded regardless.
- If the competitor was unable to complete ½ of the advertised laps in the previous race, they will have to put laps on the tires for them to be eligible for the next event. All laps added to tires for the next event must be at race-time speeds.
- Teams are responsible for putting damaged tires or tires with insufficient laps in the tire building and not the conex building, if the competitor intends to add additional laps and/or scuff in new tires for the next event.
